The International Webinar:

Endonasal Rhinoplasty VII

Sunday October 4th, 2020 | 11:00 LA | 12:00 Denver | 13:00 Chicago | 14:00 NYC | 19:00 London | 20:00 Berlin

Dear Friends and Colleagues,

This webinar series is designed to portray the unique characteristics of the endonasal rhinoplasty operation and its fundamental differences with open rhinoplasty concepts.

As selection of scientific programs is increasingly determined by webinar attendance in the post-COVID era, a substantial degree of interest in endonasal concepts is being unmasked: This endonasal webinar series has attracted up to 1052 and never less than 550 attendees per session.

The present webinar gathers experts to specifically discuss which elements of the nasal anatomy should be considered for conservation through an endonasal approach. Discussion will be case-based and focused.

Total duration is 180 minutes.

Panelists: Nabil Fuleihan, Holger Gassner, Norman Pastorek, Stephen Perkins, Abel-Jan Tasman, Geoffrey Tobias

Best regards,

Abel-Jan Tasman
Holger G. Gassner
